

HealthLink MyNurse

Connecting Families with Quality Elderly Healthcare Providers

MyNurse application is an online match maker to cater for elderly and family who need the services of healthcare providers – qualified nurses. The app will provide management of online contract between qualified nurses who have registered as MyNurse and the elderly and families wherever and whenever the services of qualified nurses are required. This will ensure the right qualified nurses are crowd sourced for the elderly and the busy scheduled of the families. This way, people can save a lots of money that they used to pay the agencies. The novelty of the app is the several years researched database of certified proper care in terms of nutrition, medication and daily care for nurses to use towards the elderly.

1. Search for service provider
