## Antibiotic-free chicken

- Antibiotic-free chicken is a safe and healthy choice for human consumption. It is fed with natural and environmental friendly feed supplement derived from postbiotic metabolites of probiotic *Lactobacillus* sp. The postbiotic metabolites can be used as a replacer to in feed antibiotic growth promoter to overcome the hazardous antibiotic resistance problems.
- Two patents are granted and a few patents are pending for the technology of postbiotic metabolites. Granted patents: China (CN20130231703.0) & USA (US 9,271,518 B2). Filed patents: Malaysia (PI2010005787), EU (09788115.5), Brazil (PI0918470-8), Vietnam (1-2011-00452), India (624/DELNP/2011), Australia (2009344224).
