

EduPsyche KIT is an apps purposely develop to be the one stop center for parents, teachers, medical practitioner, therapist and psychologist to actively involved in real time discussion.

By using this apps parents have opportunities to measure their children's aggressive tendencies, social skills, self-concept, values, cognitive function and well-being that has been validated through the empirical studies. From the test they have answered, this apps will generate the psychosocial profiling result that is helpful for parents to maximize potential and build characters for their children.

The psychosocial profiling is crucial to guide psychologist in proposing the best solutions for potential problems in parenting skills and work together with teachers, medical practitioner and therapist for effective solutions.

CURRENT STATUS

- This apps has been proposed firstly to schools communities and received outstanding feedback. The apps expected to be accessed in 2019
