

HEAVY METAL REMOVER POLYMER

ImprintSorb is specifically designed and manufactured for high efficiency removal of Hg in water and condensate. This polymer adsorpt Hg very fast and it is recyclable for more than 10 times.

CURRENT STATUS

- Working on funding application.
- Contacting companies for the prob interview. We're trying to look at small scale industries for pilot testing.

ACHIEVEMENT

- Tech Plan Demo Day 2017 - 2nd place
