

Production of customized enzymes for the Malaysian and global markets. Zymeratics is focused on replacing the use of harmful chemicals in industrial process with customized, patented enzymes for various applications of enzymes in solid waste management, food & beverage production, oleochemical & speciality fat industry as well as detergent & home-care products formulation. Zymeratics's enzymes are highly thermostable and organic solvent tolerant which are suitable for robust industrial applications.

### ACHIEVEMENT

**Total fund secured RM3.2m**

- MTDC
- PlatCOM Venture AIM
- Cradle

October 2014 : Winner for Energy Efficiency Category for Global Cleantech Innovation Programme (GCIP) (Malaysia)

November 2015 : National winner for GCIP Malaysia

### CURRENT STATUS

- Setting up enzyme immobilization pilot plant
- Seeking funding approximately RM 4 million to build upstream processing facility of enzyme production
- Commercialising the enzyme

1st Prize Winner Swiss Innovation Challenge Asia (Malaysia) 2017

Bionexus Status Company 2017

3rd Place Winner TechPlanter 2017
