

The superior all-fiber based PutraLaser Fiber Laser Marking System comes in a compact size with an integrated intelligent optical pulse control that facilitates the generation of designed optical pulse. As a result, the technologically advanced innovation is capable of optimum marking results on different material surfaces, high resolution marking, colour marking on stainless steel surface, and tampered free marking with very low power consumption.

ACHIEVEMENT

Total fund secured RM50k

- PPRN Ministry of Higher Education Malaysia.

CURRENT STATUS

- Market validation - validated customer segment
